

## New GDC Boot Camp TEAM WORKSHEET TWO

How are we using advances in educational, developmental and social science to make our catechesis more effective?

How skilled are catechists in using a variety of methods to share the faith with learners?  
How does the variety of methods fit with the cultural context of our community?

Who is “on the peripheries” in our community? How can we strengthen our catechetical efforts with those individuals and groups?

Choose one of the following scenarios to discuss in your group, and work together on a plan to meet the catechetical leader’s needs (Write your response on the back of the page):

**SCENARIO A** – Veronica is the DRE at a parish with 750 families. She has recently seen an increase in the number of students with autism, ADHD and other diverse learning needs in her program. What can she do to make sure she meets these needs?

**SCENARIO B** – Anthony is the Director of Evangelization in a rural parish that includes a small town, several outlying farms, and areas in which migrant workers live. Anthony wants to make sure he meets the catechetical needs of everyone in the parish boundaries, including (and especially) the migrant workers. What steps can he take to ensure that this happens?
